HOW TO SEASON A BAT

- Apply raw linseed oil to the face, edges of the bat evenly. While oiling take care not to over the bat.
- Leave the bat horizontal and face up to dry for at least 24 hours.
- Do not apply oil on bats with full protective tape on it.
- KNOCKING of the bat is very IMPORTANT as it increases the performance of the bat and also the life span of the bat.
- Start by hitting the middle of the bat slowly. The edges and toes of the bat needs to be carefully handled as hitting hard on them may crack the willow. The back of the bat need not to knocked.
- After knocking it is advisable to use it in the nets with old cricket ball.
- Apply fibre tape

MAINTENANCE OF CRICKET BAT.

- Check the bat regularly for any damages.
- In case of damage to the bat take immediate action.
- Do not use the bat until the bat is repaired.
- Do not keep the bat in very hot and wet areas.
- Do not use cheap hard balls.
